

# Analysis of Deagel.com Forecasts

By Craig Paardekooper

Deagel.com provided the 2025 forecast for population of each country. I obtained their forecast data before it was taken down in April of this year. However, the data had been safely archived and was still available for analysis.

I calculated the % population reductions for each country based on the difference between the current population and the 2025 forecast, and rank sorted each country in order of largest population reduction.

My hypothesis was that the cull would have an epicentre, centred in the countries/ powers who were running the pandemic – namely the G7.

I also hypothesised that those countries making the vaccines would right at the heart of the slaughter.

Here are the results of my calculations -

	Country	Pop. 2019	Pop. 2025	% Change
	North Macedonia	25	1.9	92.4
G7	United Kingdom	65	14	78.5
	Ireland	5.2	1.3	75.0

## Observations

### 1. The G7 countries are clustered near the top of the list – their % population reductions are

- a. UK 78.5%
- b. USA 70.2%
- c. Germany 65%
- d. France 41.8%
- e. Italy 30.6%
- f. Canada 29.7%
- g. Japan 17.6%

### 2. Three countries dominate the top positions –

- a. UK
- b. USA
- c. Germany

These are the very 3 countries involved in the production of the vaccines – Astrazeneca, Moderna and Pfizer vaccines

### 3. There are many countries with no culling. For example –

Bahamas	0.3	0.3	0.0
Belize	0.4	0.4	0.0
Bhutan	0.8	0.8	0.0
Bolivia	11	11	0.0
Botswana	2.3	2.3	0.0
Cape Verde	0.6	0.6	0.0
Central African Republic	6	6	0.0
Chile	18	18	0.0
Colombia	49	49	0.0
Djibouti	0.9	0.9	0.0
Fiji	0.9	0.9	0.0
Grenada	0.1	0.1	0.0
Indonesia	267	267	0.0
Jamaica	2.8	2.8	0.0
Kiribati	0.1	0.1	0.0
Lithuania	2.7	2.7	0.0
Maldives	0.4	0.4	0.0
Mauritius	1.4	1.4	0.0
Micronesia	0.1	0.1	0.0
Montenegro	0.6	0.6	0.0
Nicaragua	6.2	6.2	0.0
Paraguay	7.2	7.2	0.0
Peru	31	31	0.0
Republic of the Congo	5.3	5.3	0.0
Romania	21	21	0.0
Rwanda	12	12	0.0
Saint Vincent and the Grenadines	0.1	0.1	0.0
Samoa	0.2	0.2	0.0

Sao Tome and Principe	0.2	0.2	0.0
Solomon Islands	0.7	0.7	0.0
Sri Lanka	22	22	0.0
Timor-Leste	1.4	1.4	0.0
Tonga	0.1	0.1	0.0
Uzbekistan	30	30	0.0
Zimbabwe	14	14	0.0

#### **4. There are many countries that actually have a population increase –**

India	1,330	1,341	-0.8
Egypt	104	105	-1.0
Vietnam	98	99	-1.0
Turkmenistan	5.5	5.6	-1.8
Costa Rica	5.1	5.2	-2.0
Algeria	42	43	-2.4
Laos	7.5	7.7	-2.7
Malaysia	32	33	-3.1
Tajikistan	8.9	9.2	-3.4
Myanmar	56	58	-3.6
Venezuela	28	29	-3.6
Papua New Guinea	7.3	7.6	-4.1
Guinea-Bissau	1.9	2	-5.3
Cambodia	16	17	-6.3
Honduras	9.2	9.8	-6.5
Philippines	109	117	-7.3
Bangladesh	162	178	-9.9
Dominican Republic	10	11	-10.0
Nepal	30	33	-10.0
Comoros	0.8	0.9	-12.5
Georgia	4	4.7	-17.5
Lebanon	5.5	6.6	-20.0
Eswatini	1.1	1.4	-27.3

**The main conclusions from this would be –**

- 1. It is extremely dangerous to stay in UK, USA or Germany – the epicentres of this slaughter – the places where they make the vaccines (4 in 5 will die here)**
- 2. G7 countries in general are a bad idea (1 in 3 will die at best)**
- 3. European countries in general are unsafe.**
- 4. The European countries I have high-lighted in yellow, appear to be the safest - Romania, Belize, Chechia, Lithuania, Finland, Hungry, Latvia (in the latter only 1 in 20 die)**
- 5. There are quite a number of countries where there is no culling**

#### **In Summary**

**Get as far away as you can from UK, USA and Germany. These monsters are planning the utter destruction of their own populations. It is almost like a suicide cult.**
